www.nextnormal.in

Our Story since 2008...

Next Normal is a recognised design and production company, based out of Mumbai, specializing in providing comprehensive solutions in the fields of corporate events, web development and digital marketing.

Corporate Events

- 78 Conferences & Exhibitions
- 14 Virtual Events & Webinars
- 12 Award Functions
- 13 CEO Roundtables.
- 1200+ Speaker participations
- 250 to 1500 Attendees per event .

Web Development

- Nehru Centre Mumbai
- Open Canvas
- World of Westar
- Kolber Geneve
- Echjay Group
- Talking Heads Macro
- Sonic Lumin

Digital Marketing

Social Media & Email Marketing
executed for

- The Indian Chemical Council
- Chemicals & Petrochemicals
Manufacturers' Association
- Santa's Square Christmas
Festival

By leveraging our expertise in corporate events, web development, and digital marketing, our clients keep returning to **NEXT NORMAL** for innovative experiential concepts and precise logistics — all at substantial savings.

Our Corporate Event Services

1 Experiential Design

2 Logistics Management

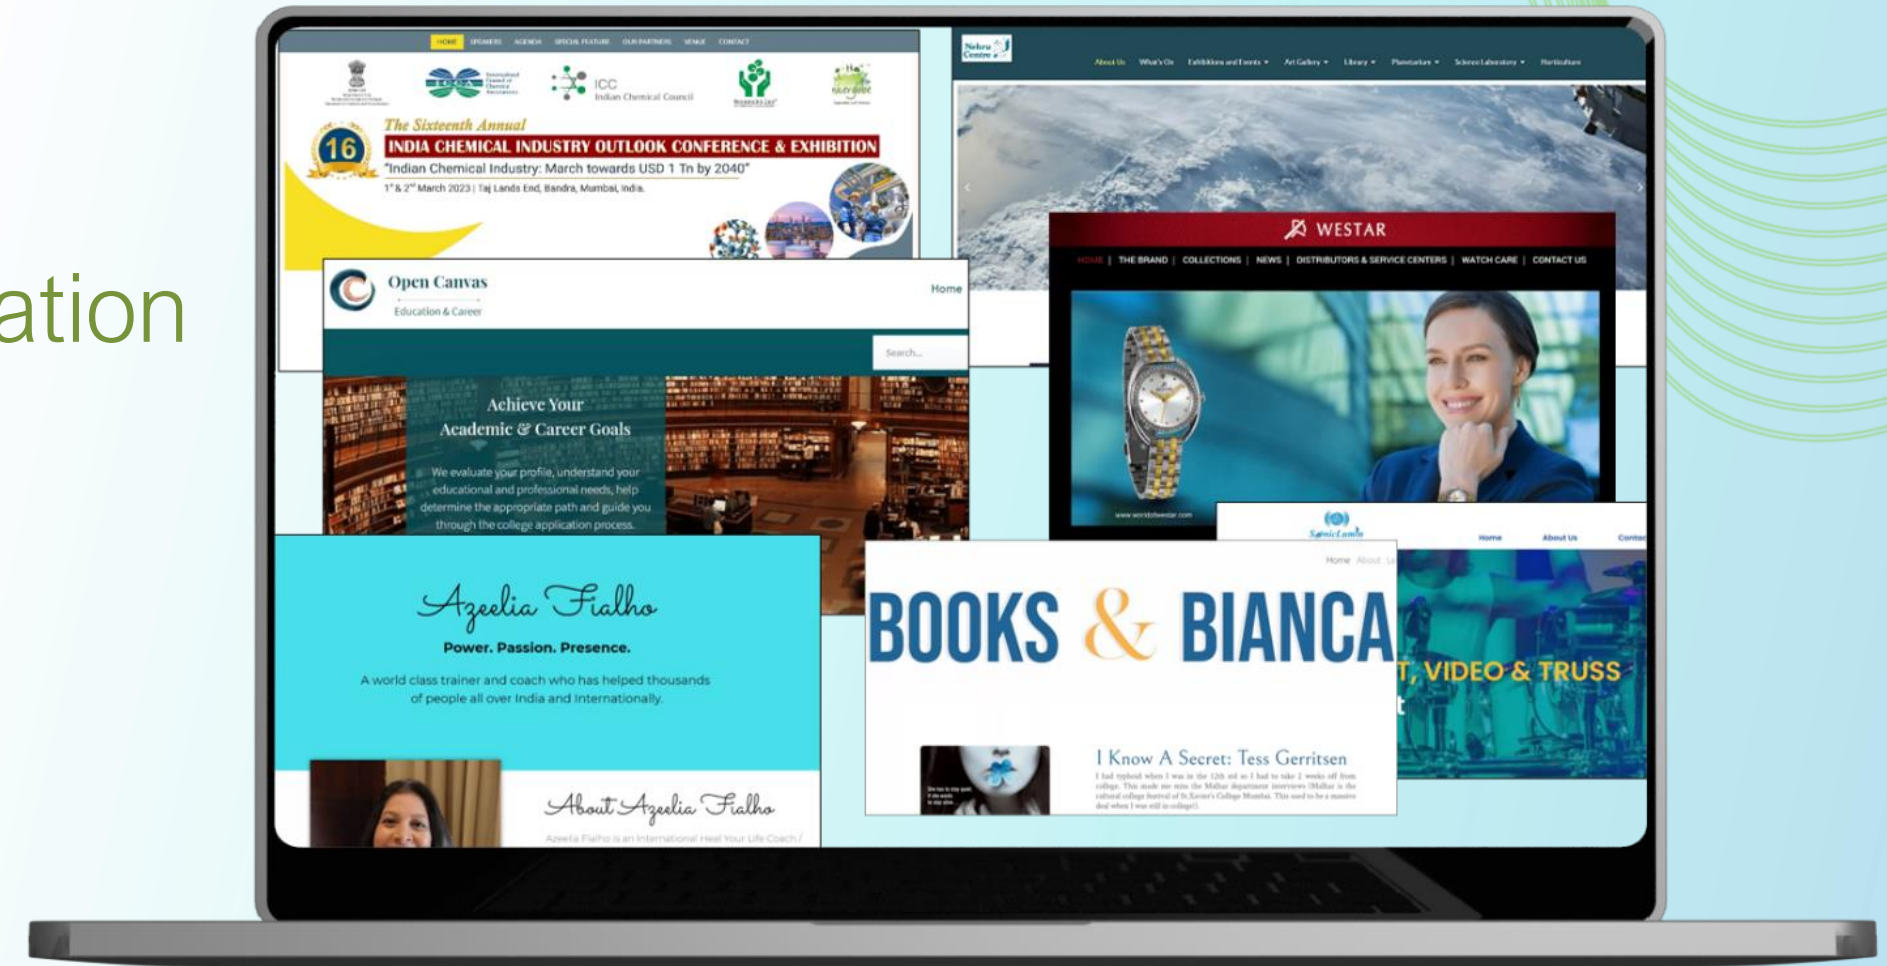

3 Décor & Fabrication

4 Lighting & Sound Design

Our Web Development Services

- 1 Responsive Website Design
- 2 Website Hosting & Domain Registration
- 3 SEO Optimization
- 4 Web Maintenance & Support

Our Digital Marketing Services

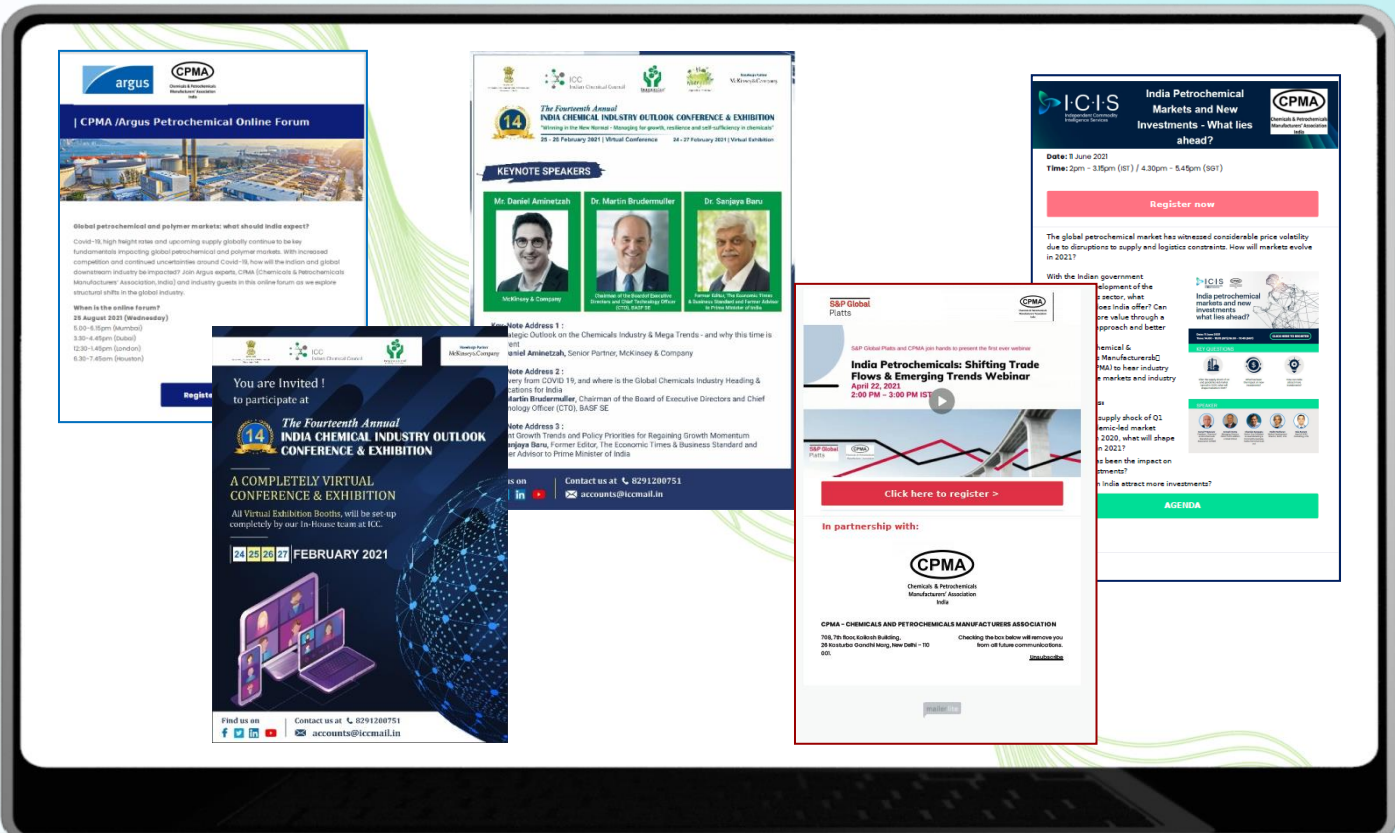

- 1

Content Creation
- 2

Social Media Management
- 3

Email Marketing
- 4

| CPMA /Argus Petrochemical Online Forum

Global petrochemical and polymer markets: what should India expect?

Covid-19, high freight rates and upcoming supply globally continue to be key fundamentals impacting global petrochemical and polymer markets. With increased competition and continued uncertainties around Covid-19, how will the Indian and global downstream industry be impacted? Join Argus experts, CPMA (Chemicals & Petrochemicals Manufacturers' Association, India) and industry guests in this online forum as we explore structural shifts in the global industry.

When is the online forum?
25 August 2021 (Wednesday)
 5.00–6.15pm (Mumbai)
 3.30–4.45pm (Dubai)
 12.30–1.45pm (London)
 6.30–7.45am (Houston)

The Sixteenth Annual INDIA CHEMICAL INDUSTRY OUTLOOK CONFERENCE & EXHIBITION

"Indian Chemical Industry: March towards USD 1 Tn by 2040"
 1st & 2nd March 2023 | Taj Lands End, Bandra, Mumbai, India.

ABOUT THE CONFERENCE
 The Chemical industry for the coming decades has a few key concerns and challenges to managing Climate Change, Decarbonisation, Circularity and Sustainability. All these and many more will lead us to change. Will this mean a focused change in creating a risk-adjusted future product portfolio? A robust R & D to change feedstock? Localization of Supply chain - a result of the pandemic?
 The chemical industry is resilient enough to REBOOT, RESET, RETHINK and REBOUND back in 2023 in a more resolute way to surprise the stakeholders. ICC with McKinsey & Company as a knowledge Partner has always brought to you the latest forward-looking program, covering your immediate and future needs.

KEY SPEAKERS

 Executive Director, Reliance Industries Ltd.	 Global CEO, Syngenta	 Chairman & Managing Director, Gujarat NREDC Ltd.	 Vice Chairman, UPL Ltd.	 Managing Director & CEO, Tata Chemicals Ltd.	 Sr. Partner, Denver & Rocky Mountain, McKinsey & Company, USA.

India Petrochemical Markets and New Investments - What lies ahead?

Date: 11 June 2021
Time: 2pm – 3.15pm (IST) / 4.30pm – 5.45pm (SGT)

[Register now](#)

The global petrochemical market has witnessed considerable price volatility due to disruptions to supply and logistics constraints. How will markets evolve in 2021?

With the Indian government supporting development of the petrochemicals sector, what opportunities does India offer? Can India create more value through a cluster-based approach and better collaboration?
 Join ICIS and Chemical & Petrochemicals Manufacturers' Association (CPMA) to hear industry experts analyse markets and industry trends.

Key questions:

- After the supply shock of Q1 and pandemic-led market turmoil in 2020, what will shape markets in 2021?
- What has been the impact on new investments?
- How can India attract more investments?

KEY QUESTIONS

India petrochemical markets and new investments what lies ahead?

11 June 2021
 2pm - 3.15pm (IST) / 4.30pm - 5.45pm (SGT)

The Fifteenth Annual INDIA CHEMICAL INDUSTRY OUTLOOK CONFERENCE & EXHIBITION
"India's USD 5 Trillion Economy : Role of Chemicals in Navigating the Future"
01 - 02 March 2022 | Taj Lands End, Mumbai.

PHYSICAL IN-PERSON CONFERENCE & EXHIBITION PROSPECTUS

ABOUT THE CONFERENCE

COVID-19 has impacted multiple facets of our lives, from how we work to the way we conduct businesses. As the world emerges out of this pandemic the new realities would be a clearer view on climate change and its impact. World will be warmer by 1.5 C by 2030. We would also be 8.6 Bn in population by then and nearly 2/3rd of the population would live in cities. We may also see a bipolar world with China surpassing USA in GDP.

The relation between China & USA could impact business at large and trade flows. In the meantime the impact of the pandemic would have changed many things for good. A major change would be Consumer Behaviour and consumption pattern. A faster rate of digitalisation would convert incremental changes to mega trends. ICC with McKinsey as knowledge partners always brings to the forefront new emerging trends in business and trade in this edition of the conference you would find eminent speakers sharing with you their thoughts on how the world will emerge post pandemic and the changes that would irrevocably change our lives. Some of the interesting areas would be sessions on

- Industry think-tank:** McKinsey would facilitate a think-tank where CXOs and McKinsey would present learnings and case studies on "Globalization of Indian Chemical Industry"
- Startup bootcamp:** Elevator pitch by emerging startups - more global participation (in areas like digital platform for sales / biotechnology linked R&D acceleration / agro-chem / supply chain / IoT). Guest panelist include dignitaries from incubators / VCs / DPIIT etc. This will help bring new connects for ICG ranging from the world of startups to investors and government bodies
- Agro Chemicals & Specialty Chemicals Break Out Session:** CXO's view on industry going forward domain experts covering in depth analysis

Argus Data Science Studio
Understand commodity prices through machine learning and probabilistic forecasting

The Argus Data Science Studio is a powerful new modelling tool designed to support your analytics, trading, hedging and risk management decisions. Using new machine learning technology for probabilistic forecasting and location-based trading data, the studio integrates physical and financial commodity prices. The machine learning models that power the studio are inherently explainable and fully customizable, enabling you to unearth unique solutions and greater insights faster.

VOLATILITY IN COMMODITY PRICES CREATES OPPORTUNITIES, ALONG WITH RISKS

If you are involved in building commodity trading or hedging strategies, then understanding the direction of prices is crucial to your success. Whether you are a quant strategist, data scientist or a trader, forecasting prices is the goal. But this is impossible to do with any degree of accuracy. So financial institutions, trading houses and physical buyers and sellers around the world are using the Argus Data Science Studio to reveal the uncertainties and volatility associated with the commodity prices they depend upon.

HOW CAN THE ARGUS DATA SCIENCE STUDIO HELP YOU?

- Identify market risks that you were previously unaware of
- Build a more complete view by incorporating market fundamentals and pricing insight into your decision-making.
- Gain key insights on possible future energy prices and estimate volatility and the balance of risk.
- By having more robust capabilities for scenario analysis and stress testing your portfolios, you can better handle extreme market events that are occurring more frequently in the current economic environment.
- Generate new trading ideas through the directional and volatility signals produced.
- We offer a flexible platform for developing and expanding your data science capabilities, that would otherwise cost you millions of dollars and many years to develop internally.

THE ARGUS DATA SCIENCE STUDIO IS BASED ON THREE KEY Pillars

Scenario analysis - test your own or historic scenarios to understand what might happen to the forecast under different assumptions, to help you build the most robust trading and hedging strategies.

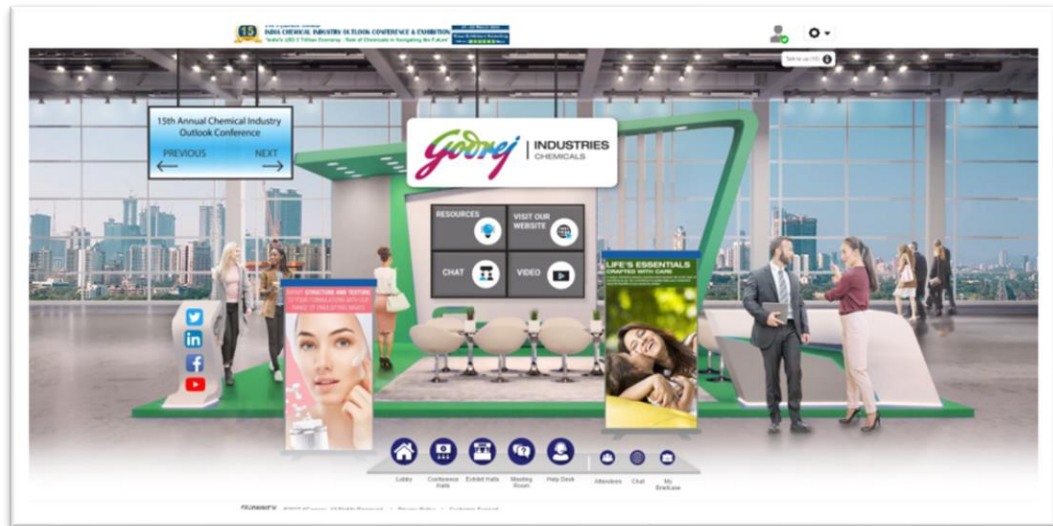

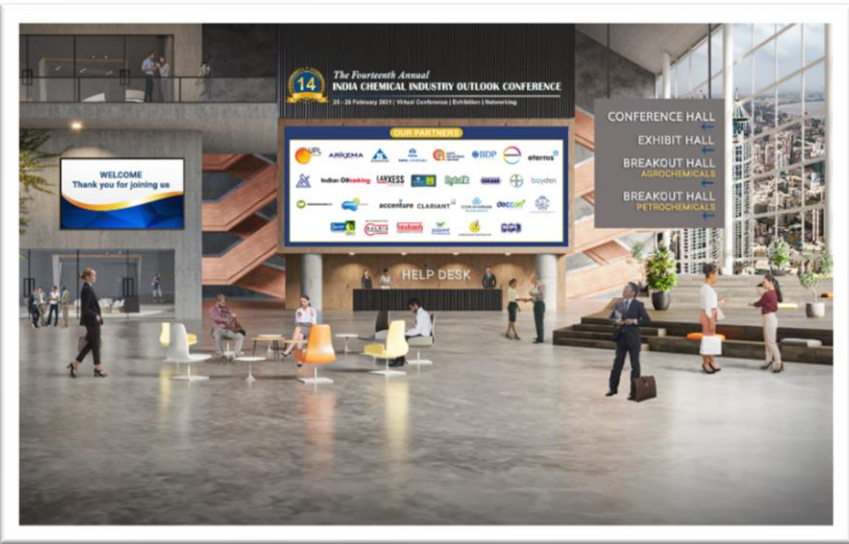

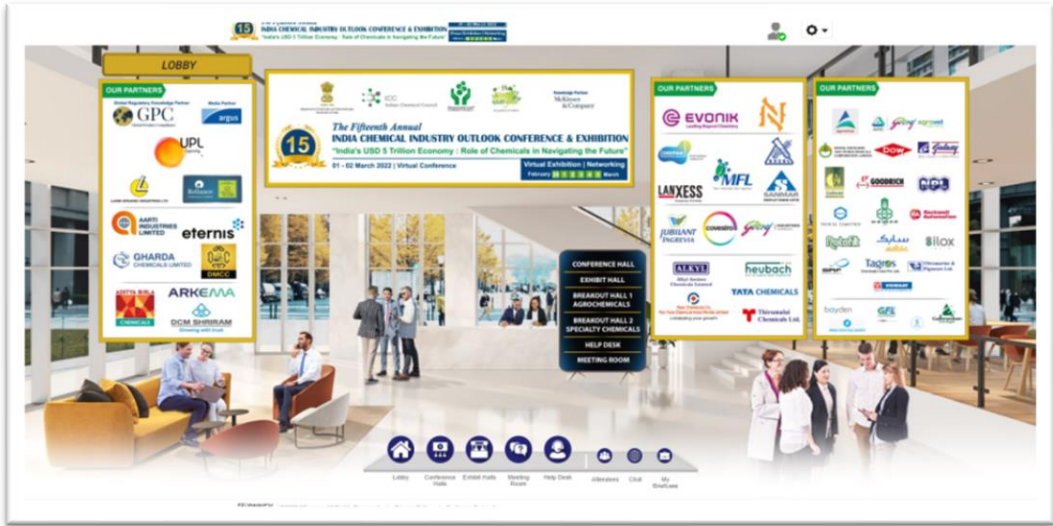

Customisable machine learning models - incorporate your own market expertise and intuition by adjusting the model structure, such as the relationship type between drivers and the model, what kind of distribution is used, and any external constraints that are unique to your business. Your view of the market is independent to you, so your models need to reflect this.

Use of client owned data - add your own data to the model, alongside any proprietary Argus data. Any datasets, from any sources, can be added to the studio, to create a custom-made model unique to your business.
